EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 4, before the word "method", insert the word "The".

2. The following is an examiner's statement of reasons for allowance: applicant has found a novel and unobvious process of making Memantine hydrochloride. Patentability lies in the use of formic acid in the process. The prior art fails to provide sufficient guidance that would render obvious the use of formic acid. Moreover, the use of formic acid has resulted in a process that has numerous advantages over the prior art. For example, the memantine hydrochloride produced by the claimed process is more stable and more suitable for up scaling the process for industrial use.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Samuel A. Barts whose telephone number is 571-272-2870. The examiner can normally be reached on 6:30-3:00.
